

SMALL WHEELS WITH SUSPENSION

High pressure, low resistance tyres used with well engineered suspension provide a smooth effortless ride, quick acceleration and reduced aerodynamic drag.

ADVANCED SPACE FRAME

The unique spaceframe provides a low step-over height whilst maintaining a super-stiff, lightweight structure. Separable models split into two halves for storage or transport.

VERSATILITY

With options for bags, racks, mudguards and different handlebars, there is a Moulton for every use. Whether it's commuting to work or riding around the world, the Moulton can do it all.

BRITISH-BUILT QUALITY

Every Moulton bicycle is hand built in the UK with painstaking attention to detail. The advanced suspension systems and exquisite frames are true engineering excellence.

MOULTON[®]
BICYCLE COMPANY

TSR9

A light, versatile machine with all the defining Moulton features. At home in town or on the trail, travel in true Moulton comfort with the TSR9. Also available as TSR27 DualDrive with wider gear range.

TSR30

Perfect for day rides, audax and touring and excellent for fast road commuting. Available with carrier racks, bags and mudguards. Ride into the city, or load up and go wherever the road takes you.

AM SPEED

The original Alex Moulton design, backed with serious racing pedigree. Originally developed for the RAAM, the AM SPEED is the lightest and fastest incarnation of the iconic AM series Moulton.

AM GT

The legendary Moulton space frame, lovingly and painstakingly crafted in bright stainless steel. The AM GT is a Grand Tourer in the classical sense - many owners have travelled the world on these beautiful bicycles.

NS Stainless

The next generation of comfort and speed, the New Series Moulton features advanced Flexitor front suspension, Hydrolastic rear suspension, and a lighter, stiffer, stainless steel frame.

NS Double Pylon

The ultimate Moulton takes spaceframe construction to a new level. Stainless steel 'pylons' replace head and seat tubes to further increase stiffness. Sublime ride comfort and breathtaking looks.

Separable frame in Columbus/Deda/Reynolds mix · V-type brakes · Straight bars
Moulton leading link front fork · Moulton dry cone rear suspension · 20" wheels
SRAM 9 speed transmission · Option- 27 speed using SRAM DualDrive hub)

Separable frame in Columbus/Deda/Reynolds mix · Dual Pivot sidepull brakes
Moulton leading link front fork · Moulton dry cone rear suspension · 20" wheels
Straight or Drop 'bars' · Campagnolo Centaur 3x10 transmission

Original Alex Moulton 'AM' design · Fixed frame in SNCM steels · Sidepull brakes
Moulton Leading link front fork · Moulton dry cone rear suspension · 17" wheels
Typical Spec. - Moulton 'Wishbone' Stem, Shimano 105 2x9, drop handlebars

Original Alex Moulton 'AM' design · Separable stainless steel frame · Sidepull brakes
Wishbone stem · Leading link front fork · Hydrolastic rear spring, flexitor pivot
17" wheels · Typical Spec. - Shimano Ultegra 2x9 transmission, Drop handlebars

Separable stainless steel frame · Wishbone stem with straight, drop or Mosquito handlebar
Flexitor front fork · Hydrolastic rear spring, flexitor Pivot · 20" wheels · Sidepull brakes
Typical Spec. - Shimano Dura-Ace transmission · AM Ti seatpost · Brooks leather saddle

Separable or Fixed stainless steel Double Pylon frame · Sidepull brakes · Parallel adj. stem
Flexitor front fork · Hydrolastic rear suspension, flexitor pivot · 20" wheels
Typical Spec. - Shimano Dura-Ace transmission · Brooks leather saddle
